1. Endorse the coordinated discharge planning and service implementation for at-risk youth among all systems involved in their lives through providing communities with sample Memoranda of Agreements.  (no cost)

2. Seek out resources, comprised of state and community partners, to conduct a study which develops a set of recommendations for a coordinated system of children’s behavioral health services and direction for interagency communication. This may include:

- A cross systems analysis, addressing methods for honoring guidance on minors’ rights to confidentiality (HIPAA, FERPA, IDEA, State statutory guidance, etc.)
- Models for successful interagency communication and care coordination.  (low cost)

3. Promote collaboration among schools, providers, and Local Collaboratives in the planning, implementation and application of data-driven and evidence-based trainings that utilize state and local data and local expertise through:

- Showcasing communities where System of Care is being implemented currently across the state.  (low cost)
- Promoting strategies used by LCs and schools to successfully collaborate.  (no cost)
- Identifying and promoting opportunities for LC members to engage with schools, such as attending district School Health Advisory Council meetings.  (no cost)
- Encouraging the use of existing training opportunities such as the Administrator’s Conference, Behavioral Health Collaborative Conference, and Head to Toe to build awareness of school behavioral health.  (low cost)
- Encouraging schools to use county specific data such as the Youth Risk and Resiliency Survey and DOH epidemiological data to identify and focus topics for in-services.  (low cost)
- Requiring the Statewide Entity to develop and implement a Master Training Calendar and resource list, contingent on contractual requirements.  (some cost)
